

VisigothicPal

VisigothicPal is a resource for the study of [Visigothic script](#) and its manuscript sources. It is the digital counterpart of the project ViGOTHIC which aims to facilitate the study of this script, to make the scientific community aware of the needs and possibilities of conducting research based on Visigothic script sources, and to disseminate the research already carried out or in progress. VisigothicPal and ViGOTHIC intend to open the study of Visigothic script to everyone interested in Manuscript Studies.

The project is funded by the European Union's Horizon 2020 Marie Skłodowska-Curie research and innovation programme, and it is based at King's College London.

You can learn more about the **VisigothicPal project** in the following posts:
